Dear Customer,

This price list outlines all the parts we can supply for the Jaguar Mk 5. These parts are mostly new reproduction. We try to hold as many parts in stock as possible, but some items are bought to order. If there is an item you require that is not listed, please let us know and we will make every effort to locate it for you and may be able to supply a used original part from our large selection.

Orders can be placed by WhatsApp, email or over the phone, when ordering please state our reference numbers (which appear on the far left of the page) and **provide details of your car – the make, year, chassis and engine numbers, body style and whether it is right or left hand drive**. If you are aware that the car has been modified or fitted with non-original parts please let us know as, unless notified, we will assume it is as original.

PRICES

The prices quoted are **per item** unless otherwise stated and are all in GBP. Whilst every effort will be made to adhere to the prices shown, we do reserve the right to make changes if necessary without prior notice. Any such change will be made known to the customer before sending out the order.

Please note the prices shown DO NOT include VAT - this will be added to orders for UK customers.

Payment can be made by debit or credit card (we are licensed to accept Visa and MasterCard) or by bank transfer. We also accept Paypal for orders of £100 or less.

SHIPPING/POSTAGE

Parts can be shipped to any part of the world using post or carriers on a door-to-door service - please see our terms and conditions. For small UK orders we used a tracked Royal Mail service. For larger UK orders, and all shipments going abroad, we use a variety of couriers using the company World Options.

Please note customers from the EU (and other countries) will need to pay customs/import duties when their parcel arrives in their own country. We are not involved in this - the courier should send the appropriate information and links via email.

WEBSITE

There are photos of most of the parts in this price list on our website, along with limited quantity items and Jaguar literature. We also have an expanding original parts section, the history of the company, photos of customer's cars from around the world and a restoration blog. New suggestions/contributions to our website are warmly welcomed. We are also on Facebook, see the **Mk 5 Community Group**.

STAFFING

WCS continues to be a family run business. Michael has now 'semi-retired' and works for the business on three days a week - Wednesday to Friday. I continue to be in the office from 1pm to 5pm each weekday (I have another job as a primary school teacher in the mornings!). If you have a technical enquiry that needs Michael's expertise, please ring the office and ask for a call back.

EXCHANGE CYLINDERS - please note that to qualify for an exchange, returned cylinders must be in a restorable condition and of the same specification as the replacement cylinder which we send. Cylinders with broken or missing studs do not qualify as an exchange as the studs cannot be replaced.

LATE System FRONT Cylinders **(Special Order Item)**

These cylinders for the Mk 5 front late braking system are virtually impossible to obtain. There is a possibility that old cylinders could be professionally rebuilt but we have found that due to the brittle nature of this particular cylinder it is only a low percentage that are found to be suitable for rebuilding. Certainly if there is any damage to the studs these cannot be replaced and the cylinder is scrap.

There is an alternative cylinder that we can obtain but it does require a modification - the area on the cylinder that locates the end of the brake shoe needs to be machined to match the original. Also the hole centers are a slightly different dimension and require the back plate holes to be filed out by a small amount.

Terms & Conditions

USED PARTS

Although as good a description as possible will be given of the second-hand items, everyone's idea of condition varies. If there is a known or obvious fault with the part, then the prospective customer will be made aware of it. However, if we supply any second-hand part, be it a single item or a mechanical or mechanised part, or any item that consists of component parts, which is later found to be faulty, unfortunately we would be unable to offer a refund or a replacement part. By the very essence of their nature, second-hand parts are always an unknown quantity, and no guarantee can be given to their condition. It is at the buyer's risk that such items are purchased.

DISCOUNTS

We regret that we cannot give discounts, however large the order or regular the custom. We feel it is fairer to price the parts as competitively as possible to give a fair deal to all our customers, some of whom prefer to order all the parts they need at one time, whilst others prefer to order over a period of time.

LIABILITY

Liability extends only to replacement free of charge, or a refund, in respect of items incorrectly supplied or found to be faulty (not including second-hand items), and notification must be received within 14 days of despatch of goods, so please check your order as soon as you receive it. We regret we cannot give refunds on parts correctly supplied but no longer required.

The return postage on any item which is returned will be paid by the customer – we do not refund return postage (unless we have supplied the incorrect item).

Please be aware that it is not uncommon for a car to have been fitted with non-standard parts at some stage, so if the new part you receive is not the same as the part on your car, do not automatically assume the new part is wrong. Let us know if you have a problem and we will try to sort it out.

BANK FEES

Customers paying by bank transfer must pay the fees charged by their own banks – we pay our own bank fees only. Where there is a short fall due to us being charged by the customer's bank, the customer will be asked to pay the difference.

POSTAGE, INSURANCE & IMPORT CHARGES

We aim to send most parcels out using a tracked service as this makes for a more secure service, tracking numbers are provided to customers on request.

For small or medium sized parcels sent within the UK we use Royal Mail's tracked 24 hour service. For larger parcels, and parcels being sent abroad, we use the courier broker World Options who give us rates with DHL, Fedex, TNT and UPS. These couriers usually deliver parcels within 5-10 days.

Orders of low value goods being sent abroad can be sent using the cheaper service offered by Royal Mail, but this is at the customer's risk. We do not offer refunds or replacements for orders which go missing when sent abroad with Royal Mail.

If a customer specifically requests a next day service this can be looked into, and we are also happy to facilitate customers who wish to arrange their own carrier.

Orders valued at £500 or over will be insured and the cost included in the shipping charge. Customers are asked to let us know if they wish to insure parcels of a lesser value.

Most orders being sent outside of the UK will incur import charges once the parcel reaches customs in the customer's country. The charges vary from country to country and we do not know how much will be charged or when. We have no control over these charges and cannot be held responsible for additional costs to customers due to their government's import policies.
